

Geometry - Unit 1

Review Glossary

This review glossary must be completed and turned in on the day of the unit 1 test.

Definitions:

1. Collinear: _____

2. Coplanar: _____

3. Parallel Lines: _____

4. Opposite Rays: _____

5. Skew Lines: _____

6. Perpendicular Lines: _____

7. *Midpoint*: _____

8. *Segment Bisector*: _____

9. *Perpendicular Bisector*: _____

10. *Angle Bisector*: _____

11. *Adjacent Angles*: _____

12. *Vertical Angles*: _____

13. *Right Angle*: _____

14. *Straight Angle*: _____

15. *Complementary Angles*: _____

16. *Supplementary Angles*: _____

Postulates:

1. *Segment Addition*: _____

2. *Angle Addition*: _____

3. The number of points that determine a line = _____

4. The number of (non-collinear) points that determine a plane = _____

5. Two lines always intersect at a _____

6. Two planes always intersect at a _____
