

CREATE A CHILDREN'S BOOK

Shel Silverstein was a famous American poet and children's book author. He wrote many well-known children's books such as *Runny Babbit* and *Where the Sidewalk Ends*.

The Missing Piece Meets the Big O is a book of his that was published in 1981. It is the story of a circle that's not quite whole, looking for something to complete it. It is a simple and elegant book that uses geometry to tell a story.

For this bonus activity, I want you to create a children's book using geometry as a core component. Make it anything you want, just make sure that you incorporate geometry into it.
