

# Mountain Gorillas

Caroline Steely

---

Gorillas are mainly chimps but bigger. When a gorilla is at least fifteen years old it weighs four hundred fifty pounds. A gorilla is stronger than six fully grown men. A gorilla can be six or five feet tall.

Baby gorillas do not look like their parents when they are born. Parents are very protective of there young . Gorillas may weigh eleven pounds .

Gorillas do eat meat they are plant eaters. Gorillas eat meat fifty percent of the time.

Gorillas are almost extinct, there are only seven hundred left.
