

## 2<sup>nd</sup> Grade Module 2: Addition and Subtraction of Length Units

**Endpoint**-where something ends, where measurement begins

**Overlap**- to extend over, or cover partly

**Ruler**- tool uses to measure length

**Centimeter**- (cm) unit of length measure

**Meter**- (m) unit of length measure = 100 cm

**Hash Mark**- the marks on a ruler or other measurement tool

**Number Line**- a line marked with evenly spaced intervals

**Estimate**- an approximation of the value or quantity of a number

**Benchmark**- a number that is a “round” number, like multiples of 10

**Tape Diagram**- visual models that use rectangles to represent the parts of a ratio using the same unit.
