

Most inventions serve at least one of three purposes:

- They make life easier (washing machines, snow blowers, light bulbs, computers)
- They save time (cars, planes, microwaves)
- They improve the quality of life (flavored pen caps, movies, DVD's, Kool Aid, Fire Extinguishers)

I want you to come up with an “invention” of your own and make a brochure for it. You must:

- Come up with a catch phrase and a logo for the front of the brochure. **(Panel One)**
- Draw a detailed picture of your invention explaining all of its parts. **(Panel Two)**
- Make a detailed list of the related industries that will be helped out by the production of your invention. **(Panel Three)**
- Draw a picture of you using your invention **(Panel Four)**
- Compose a paragraph that explains the purpose of your invention. **(Panel Five)**
- Tell the customer how much your invention will cost and where they can buy it. **(Panel Six)**
